

## Five strategic products of BSPC

Production capacity in tons per year

# Five strategic products of BSPC

## **BENZENE**

BSPC annually produces 180,000 tons of this colorless and fragrant liquid. Benzene is manufactured and supplied to domestic and foreign markets to be used in the production of styrene monomer and LABs.

## **LIQUEFIED PETROLEUM GAS (LPG):**

LPG is a flammable mixture of two hydrocarbon gases (i.e. butane and propane) used as the feed for olefin units. BSPC annually produces 40,000 tons of LPG to be supplied to domestic and foreign markets.

## **LIGHT NAPHTHA**

BSPC annually produces 350,000 tons of this hydrocarbon liquid. Light naphtha is supplied to domestic and foreign markets as the feed for olefin units.

## **HEAVY NAPHTHA**

BSPC annually produces 499,000 tons of this hydrocarbon liquid. Heavy naphtha is supplied to domestic and foreign markets to be used in the production of gasoline, kerosene, LABs, and industrial solvents.

## **REFORMATE WITH AN OCTANE LEVEL OF +98**

BSPC annually produces 700,000 tons of this product. Reformate with an octane level of +98 is supplied to domestic and foreign markets to be used in the production of Euro-4 gasoline, premium gasoline, and normal gasoline.
